Public Works

Kansas City, Kansas residents and business owners can now benefit from programs to improve water quality from stormwater runoff. A free soil test is available, and a Cost-Share program will reimburse participants for a portion of installed stormwater projects on Kansas City, Kansas properties.

50% match up to \$1,000

rain gardens, native plant swales/buffers, cisterns, and permeable pavement (driveways/patios)

The Cost-Share Program reimburses residents and business owners for a portion of stormwater control project costs installed on their property. The program includes a:

- 50% match, up to \$1000 for rain gardens, native plant buffers, cisterns, and permeable pavers.
- 50% match, up to \$75 each for two rain barrels.
- 50% match, up to \$75 each for native trees, maximum two trees per household.

50% match up to \$75 each

rain barrels, maximum of 2 per household

Each household or business property can get one free soil test to assess if their soil needs nutrients to improve soil health.

50% match up to \$1,000

rain gardens, native plant swales/buffers, cisterns, and permeable pavement (driveways/patios)
