

# Agricultural Land Use Questionnaires

**Mail Date: July 31<sup>st</sup>, 2020**

To assist the Wyandotte County Appraiser's Office in maintaining current inventories of agricultural land, property owners who currently carry an agricultural land classification on their property will be mailed an **Agricultural Land Use Questionnaire** on July 31<sup>st</sup>, 2020. It is asked that if a property owner receives a form, that they complete and return the questionnaire as instructed by the **September 1<sup>st</sup>, 2020** deadline. These forms can be returned by mail, fax, or email. If there are no changes needed, the form can be submitted on-line at: <https://alpha.wycokck.org/home>

If a property owner feels they have property that qualifies for the agricultural land classification but did not receive a form, please contact the Appraiser's Office.

## **Agricultural 'Use' Facts:**

- 'Use' values are based on productivity, not market value from sales prices
- The Kansas Department of Revenue, Property Valuation Division provides Kansas counties with the \$ per acre, which is based on soil type
- The County is responsible for type of agricultural land listed on each parcel (*Dryland, Irrigated, Native Grass & Tame Grass*)
