WYANDOTTE COUNTY IMAGING & ADDRESS VERIFICATION PROJECT

The Wyandotte County Appraiser's Office contracted with Tyler Technologies, Inc. and CycloMedia to provide high-resolution street level imagery of the exterior of every improved property in the county, as well as verify situs addresses on file. Kansas law requires counties to update property information every six years in an effort to maintain accurate data on all parcels. Correct up-to-date property information, including photographs, is crucial to ensure fair and equitable property values.

Project Goals and Benefits:

- Improve the overall quality of the county's real property data, while also making the property tax administration process more efficient.
- Assist homeowners and businesses with "before" photos in case of losses.
- Validate property addresses to identify homes and businesses for emergency response purposes.

Please note the following:

- Imagery will be captured from custom vehicles clearly marked with CycloMedia logo, along with magnetic signs indicating they are conducting an imaging and address verification project for the Wyandotte County Appraiser's Office.
- Photographs are taken from public right-of-way whenever possible.

If you have questions/concerns, please call the Wyandotte County Appraiser's Office.
We appreciate your patience and cooperation with this important project.
