- American Community Survey (ACS) data are estimates only. Caution should be used when comparing to decennial census data. Further, comparisons with other ACS data time periods should be avoided.
- Data may be estimated due to area of selection based on block group or tract level Census geography.
- Data from the ACS are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error which is inherent for the data in this table. The 2009-2013 ACS 5-year estimates are averages over the period from January 1, 2009 to December 31, 2013.
