

Wyandotte County Appraiser's Office

Kathy Bridges, RMA
County Appraiser

County-wide Street Level Image Verification Project

The Wyandotte County Appraiser's Office contracted with Tyler Technologies, Inc. and Cyclomedia to provide high-resolution street-level images of the exterior of improved properties in the county, as well as verify situs addresses on file. This project began back in October 2019 and was set to conclude by the end of December 2019. After quality control of images was conducted by both Tyler Technology and Appraiser's Office staff, it was found many images throughout the county needed to be re-taken due to the images not meeting specifications in the contract. Therefore, in March 2020 the retakes were to take place before "leaf-on" occurred so that images could be better captured. Due to COVID-19, this project has been prolonged. The image retake of the total county is now scheduled to begin the week of March 29, 2021, as long as the weather cooperates. Retakes should be complete over the next several weeks following the initial start date.

Kansas law requires counties to update property information at least once every six years to maintain accurate data. Correct up-to-date property information, including photographs, is crucial not only to the Appraiser's Office but will also provide benefits to the taxpayers of Wyandotte County, along with assisting other Unified Government departments in their day-to-day operations. The last street-level image project took place in 2013. See attached [flyer](#), and if you should have questions or concerns, please contact Wyandotte County Appraiser's Office at (913) 573-8400.
