## **HISTORIC LANDMARKS and HISTORIC DISTRICTS IN THE UNIFIED GOVERNMENT**

This list includes all historic landmarks and historic districts in the city of Kansas City, Kansas that have been officially designated at either the city, state, or national level. Please note that, effective July 1, 1977, all sites listed on the National Register of Historic Places are automatically listed on the Register of Historic Kansas Places as well. Other overlaps occur, but they are not automatic. For example, Huron Place is a locally designated historic district that happens to include five properties that are listed individually on the state and national registers. If the site has an inventory record through the Kansas Historical Society, the name of the site is hyperlinked to that record. Sites that are a part of historic districts are noted as contributing, adding to the period of significance, or noncontributing, outside the period of significance or altered to no longer add to the significance to the historic district.
