Construction in Your Area

7th Street and Central Avenue Roadway and Intersection Improvements

The Unified Government of Wyandotte County and Kansas City, KS (UG) is completing a roadway and intersection improvement project at 7th Street and Central Avenue. The roadway improvements along 7th Street are from approximately Homer Avenue northward to Reynolds Avenue, and the improvements along Central Avenue are from approximately Pyle Street eastward to Tremont Street. Please refer to the attached map. The improvements will include a new traffic signal at the intersection as well as widening of the curb radii to better accommodate truck traffic. The project also includes new asphalt surfacing, storm sewer upgrades, reconstruction of curb and gutter and pedestrian ramps, and new pavement markings and traffic signs.

What You Can Expect

The roadway contractor, Amino Brothers Company, Inc., is scheduled to start work Tuesday, March 1, 2022. As work gets underway and throughout construction, you can expect to see various construction activities, including heavy equipment, concrete work, and asphalt pavement mill and overlay operations. The project is to be complete by the end of the year, depending on weather.

Road Construction Closures & Schedule

Work will occur 7 a.m. to 6 p.m., Monday to Friday and Saturdays as necessary. No construction will occur on legal holidays or Sundays without prior approval.

Although 7th Street and Central Avenue will remain open to traffic throughout construction, motorists should expect various lane closures. On-street parking will not be available along 7th Street for the majority of the project. Access between 7th Street and cross streets will be prohibited at times. Numerous lane shifts should be expected on 7th Street and Central Avenue to allow for the contractor's work zone.

During construction activities, access will be maintained to adjacent homes and businesses. Prior to any work that may temporarily impact access to a property, notification will be made to those properties.
