

Why Use a Reel Mower?

- You just push it and it mows. You do not have to worry about starting the lawn mower or having it break down on you.
- Reel mowers are comparatively quiet.
- Reel mowers are less expensive than rotary mowers. They cost less to purchase, less to maintain and you do not have to pay for gas to fuel them.
- Reel mowers are low maintenance, you just need to periodically oil your lawn mower and sharpen the blade.
- You can get beneficial exercise when you mow with a reel mower. Reel mowers of today are much easier to push and use than those that your grandfather owned.

CALORIES BURNED	
WEIGHT	MOWING FOR 1 HOUR
130	323
140	348
150	373
160	398
170	422
180	447
190	472
200	497
210	522

- A reel mower is light enough and small enough to lift up and stow away on a wall in your garage.
- Because the blades of a reel mower spin parallel to the ground, they actually cut the grass rather than simply smashing the ends of the grass.
- Reel mowers are generally safer than rotary lawn mowers.
- No motor = No air pollution!
